

LRS[®]
OUTPUT MANAGEMENT

PRINT MANAGEMENT

Drive | Print software is a secure, full-featured and user-friendly print management solution that helps organizations cut costs and eliminate waste.

DRIVE | PRINT

Drive | Print is a comprehensive print management solution featuring extensive usage tracking and reporting capabilities, rules-based printing, fleet management tools, embedded pull-printing, device authentication, and device-agnostic mobile and guest printing features.

Increase Productivity

- Access print jobs on any print device at any location
- Achieve real-time fleet management
- Accelerate access to print jobs with automatic forwarding
- Automatically assign costs to accounts or cost centers

Achieve Cost Reduction

- Distribute print flows more efficiently
- Create print policies that optimize use of the printer fleet
- Avoid unnecessary printing
- Manage access to color printers and copiers

Greater Ease of Use

- User-friendly interface
- Quick and intuitive installation
- Comprehensive, graphically displayed information
- Streamlined mechanisms for optimizing print volumes

Enhance Security

- Ensure compliance with data protection policies
- Enable encrypted data transmission
- Facilitate single-sign-on for all printing and scanning workflows
- Define and administer user rights

Streamline Management

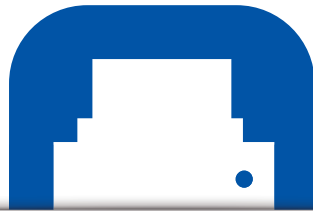

- Access detailed reporting on all aspects of MFP usage
- Automate cost allocation for print and copy usage
- Easily implement print policies
- Simplify administration of consumables

More Flexibility

- Implement print-via-email for all common document formats
- Facilitate guest access to print services
- Enjoy 100% web-based administrator access
- Customize modular functionality to specific customer needs

DRIVVE | PRINT

Print Release

- Identify jobs by name, type, properties and hold times
- Access print jobs on any print device at any location
- Preview and transform documents at the device prior to printing
- Cut pages from the document to be printed at the device
- Simultaneously release all held jobs at the device

Usability

- Single-sign-on for print and scan processes
- Users can view their personal print jobs at the device
- Personal Drivve | Print myPage for viewing printing profile
- Mobile printing via email and attachments
- Upload print jobs through secure webpage

Monitoring

- Status alerts (paper jam, out of toner, maintenance required, etc.)
- Real-time consumable levels (ink/toner, paper, etc.)
- Network monitoring and statistics (SNMP, device uptime, ping, packets, etc.)
- Event notifications by email and Windows Messenger service

Reporting

- Exact tracking of device usage for copying, scanning, faxing & printing
- Reports by users, departments, devices, billing codes, applications and workstations
- Graphic displays of consumption & environmental savings
- Schedule custom reports to run periodically

Eliminate Waste

- Eliminate unnecessary printing
- Removal of print jobs not released after a defined period
- Live tracking of printing and copying expenses
- Calculate environmental impact automatically
- Enforcement of monochrome and duplex printing
- Redirect print jobs to most cost-efficient devices

Access Control

- Complete locking of the device until authentication has been successful
- Control user access to all device services, like scanning and printing
- Authenticated release via ID card, PIN, or network credentials at the MFP ensures confidentiality
- SSL-encrypted data transfer and full GDPR compliance
- Easy self-registration of new ID cards

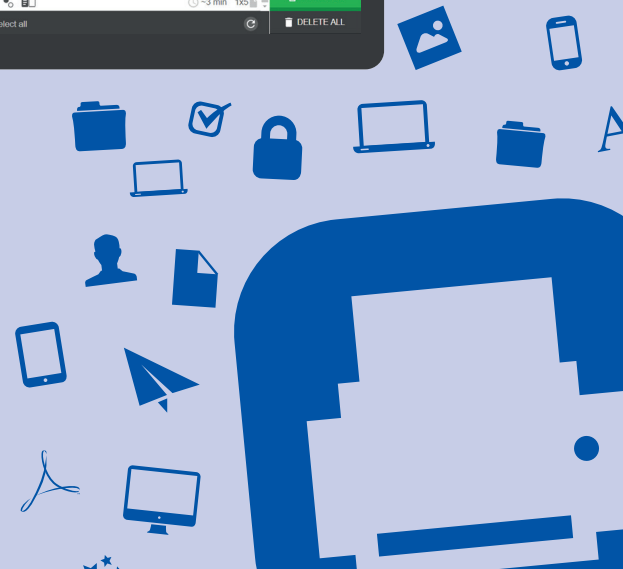

Admin Tools

- Automated installation and setup tools
- User-friendly browser-based admin interface with guest management
- Efficient user management via LDAP/Active Directory integration
- Full service logs and troubleshooting tools
- Utilizes standard Windows services (IIS, AD, SQL, SNMP)

Policies & Settings

- Printing policies based on filters, like color, number of pages, size, user, etc.
- Display integration & support of all prevalent network printers
- Tracks and manages print jobs from any platform to any device
- Automatic distribution of PIN codes and user accounts via email

The Drivve Ecosystem

Drivve offers customers an integrated ecosystem of powerful, easy-to-use software solutions for processing and managing physical and digital documents. Drivve solutions help to optimize the entire document lifecycle, from image capture and routing, to document management and workflow, to print and output management

DRIVVE | IMAGE for Image Capture and Routing

Drivve | Image streamlines digitization and document routing processes with advanced, user-friendly, customizable tools for automated document capture, processing, and secure distribution. With Drivve | Image, a multifunction printer becomes a full workflow engine that saves time, eliminates errors, and improves business processes.

DRIVVE | DM for Document Management and Workflow

Drivve | DM is an award-winning, browser-based document management system that delivers comprehensive functionality and certified security through an intuitive user interface. Drivve | DM gives organizations full control of their documents in an easy-to-use way. Key features include workflow management, document archiving, retention policies, and rules-based processing.

DRIVVE | PRINT for Print Management

Drivve | Print is a comprehensive print management solution that helps organizations achieve cost savings while managing print volumes securely and keeping the print process easy and flexible for users. Drivve | Print features extensive usage tracking and reporting capabilities, rules-based printing, fleet management tools, embedded pull-printing, device authentication, and device agnostic mobile and guest printing features.

Drivve's ecosystem of integrated document solutions simplifies and streamlines document intensive processes, allowing organizations of all sizes to reduce costs and work more efficiently.
