

LRS[®]
OUTPUT MANAGEMENT

DRIVVE | PRINT

Feature List

Print Release

- Access print jobs on any print device at any location
- Preview¹ and transform documents at the device prior to printing²
- Cut pages from the document to be printed at the device³
- Simultaneous release of all held jobs at the device

Cost Reduction

- Eliminate unnecessary printing
- Removal of print jobs not released after a defined period
- Live tracking of printing and copying expenses
- Calculate environmental impact automatically
- Enforcement of monochrome and duplex printing
- Redirect print jobs to most cost-efficient devices

Security

- Complete locking of the device until authentication has been successful
- Control user access to all device services, like copying, scanning, faxing and printing
- Authenticated release via ID card, PIN, or network credentials at the MFP ensures confidentiality
- SSL-encrypted data transfer and full GDPR compliance
- Easy self-registration of new ID cards

Management

- Automated installation and setup tools
- User-friendly browser-based admin interface with guest management
- Efficient user management via LDAP/Active Directory integration
- Full service logs and troubleshooting tools
- Utilizes standard Windows services (IIS, AD, SQL, SNMP)

¹The preview function is available for EMF and PCL6 data streams only (see system requirements <https://www.lrsoutputmanagement.com/products/drivve-products/article/5714/en/drivve-kb-article-detail>)

² Only for selected manufacturer devices

³ Removing pages from a document to be printed is only available for print jobs created by PCL6 drivers (see <https://www.lrsoutputmanagement.com/products/drivve-products/article/5714/en/drivve-kb-article-detail>)

Flexibility

- Printing policies based on filters (color, number of pages, size, user, etc.)
- Display integration & support of all prevalent network printers
- Tracks and manages print jobs from any platform to any device
- Automatic distribution of PIN codes and user accounts via email

Usability

- Single-sign-on for print and scan processes
- Users can view their personal print jobs at the device
- Personal Drive | Print myPage for viewing printing profile
- Mobile printing via email and attachments
- Upload print jobs through secure webpage

Reporting

- Exact tracking of device usage for copying, scanning, faxing and printing
- Reports by users, departments, devices, billing codes, applications and workstations
- Statistics of usage per period (volume, savings, activity, etc.)
- Graphic displays of consumption & environmental savings
- Automatic cost allocation for print and copy usage

Monitoring

- Status alerts (paper jam, out of toner, maintenance required, etc.)
- Real-time consumable levels (ink/toner, paper, output)
- Network monitoring and statistics (SNMP, device uptime, ping, packets, etc.)
- Event notifications by email and Windows Messenger service
