

LRS Cloud Print & Scan

Enterprise Output Management for the Cloud-First World

No two organizations are on the same cloud journey. That's why LRS Cloud Print & Scan delivers the same powerful output management capabilities across multiple deployment models, allowing you to choose the cloud environment that best fits your business today, while preserving flexibility as your business needs evolve.

Included in Every Deployment

Secure Printing

Protect sensitive information with secure authentication, controlled document release, and enterprise-grade security.

Scan Workflow

Digitize and route documents through streamlined, automated workflows.

Auditing & Reporting

Gain visibility into usage, activity, compliance, and system performance.

API Integrations

Connect seamlessly with enterprise applications, cloud services, and existing business systems.

LRS Mission Control

Centralized administration and management across your print and scan environment.

One Platform. Multiple Deployment Models.

Whether you have a cloud-first, hybrid, or dedicated infrastructure, LRS gives you the flexibility to choose the deployment model that best fits your organization.

CLOUD-ENABLED

Your environment. Your control.

A dedicated installation deployed in on-premises, hybrid, or private cloud environments and administered by your team or LRS.

Best for organizations that:

- Require maximum control
- Support complex environments
- Want to leverage existing infrastructure investments

CLOUD-SERVICED

Dedicated environment. Expertly managed.

A customizable single-tenant environment hosted and administered by LRS experts.

Best for organizations that:

- Want cloud flexibility with dedicated resources
- Prefer reduced operational burden
- Need enterprise-grade management and support

CLOUD-NATIVE

Simple deployment. Zero infrastructure.

LRS multi-tenant SaaS delivers a streamlined cloud experience with automatic updates and no infrastructure to manage.

Best for organizations that:

- Embrace cloud-first strategies
- Want rapid deployment
- Prefer minimal IT involvement

Why LRS?

Protect Every Job

Safeguard print and scan workflows with authentication, encryption, tracking, and compliance-focused controls.

Simplify the User Experience

Provide a consistent, intuitive experience across devices, locations, and printer manufacturers.

Connect Every System

Integrate seamlessly with enterprise applications, cloud services, identity providers, and existing infrastructure.

The LRS Advantage

40+ Years of Enterprise Expertise

Helping organizations manage critical output and document workflows.

24/7 Global Support

Worldwide support from experts who understand enterprise environments.

Multi-Vendor Compatibility

Support for mixed device fleets and evolving technology environments.

Flexible Deployment Options

Choose the cloud model that aligns with your organization's needs.

Proven Enterprise Reliability

Trusted by organizations worldwide to support mission-critical operations.

Support for Your Cloud Journey

Learn more about LRS Cloud Print & Scan solutions and discover the deployment model that's right for your organization - today, tomorrow, and beyond.
