SIMPLIFY PRINT AND OUTPUT MANAGEMENT FOR SAP S/4HANA

Don't migrate your legacy SAP individual language forms, printer tray configuration, printer definitions, and complicated print servers. **Eliminate them quickly and easily with LRS.**
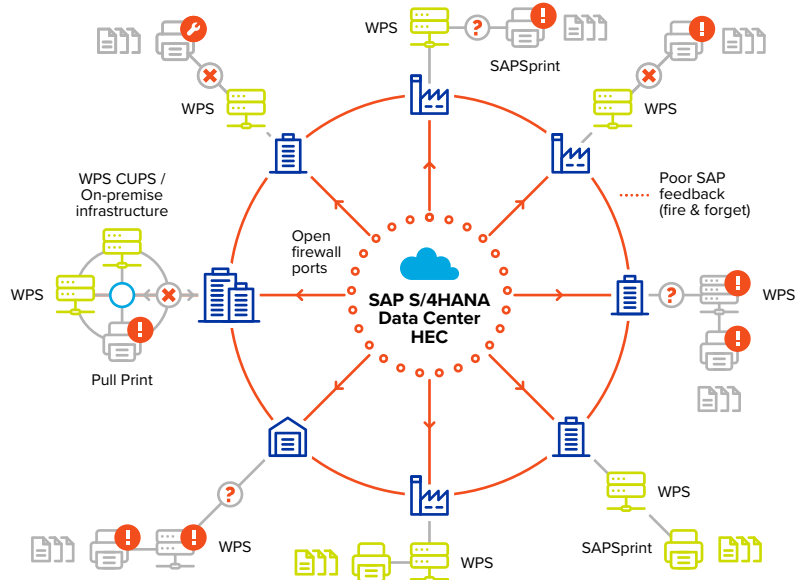

LRS Output Management

Creates a standardized digital backbone for all output, scan, and print management. This reduces infrastructure and operational costs while improving end-user experience. Typically, large SAP customers have lots of complexity managing business-critical output, leaving them printer vendor dependent and with challenges to upgrade and implement cloud and future workplace projects. Our highly scalable, stable software is unrivalled in performance and enables you to centrally manage your entire output landscape with ease. We are approved by SAP as HEC-ready and support all major SAP S/4HANA deployment options.

BEFORE
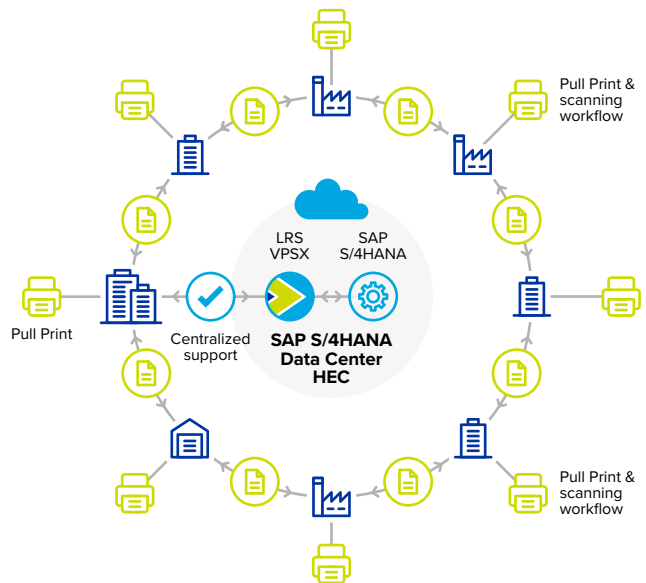

Typical SAP S/4HANA Cloud for Any-Premise Deployments

! Hundreds of firewall port openings

! 50+ distributed Windows Print Servers (WPS)

! Complex change control (printer add/change/delete)

! IT infrastructure / operational complexity

! SAP print outages

! Increased TCO

AFTER

LRS Output Management SAP S/4HANA Cloud for Any-Premise Deployments

✓ Limited firewall port openings

✓ Simplified IT infrastructure (no WPS, SAPSprint or CUPS required)

✓ 100% SAP print availability

✓ Simplified migration

✓ SAP print feedback

✓ SAP approved

✓ Reduced TCO

Implement rapidly with automated migration tools.

Make SAP forms completely independent from the printer manufacturers print driver.

↓1 Eliminate distributed windows print queues = single SAP print queue definition.
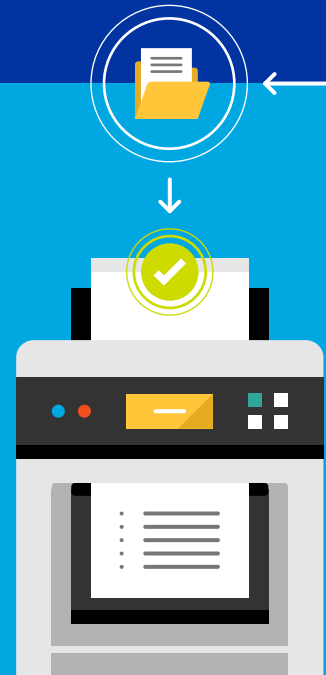

LRS has offered customers an SAP-certified BC_XOM interface for more than a decade. Today, we are approved by SAP as HEC-ready, and we support **all major SAP S/4HANA deployment options:**

Working towards...		SAP Output Management		Does LRS support it?	
❯ S/4HANA	on-premise	❯ LRS software	on-premise	❯ Yes	
❯ S/4HANA	in HEC	❯ LRS software	on-premise	❯ Yes	
❯ S/4HANA	in HEC	❯ LRS software	in HEC	❯ Yes	
❯ SAP S/4HANA Cloud extended edition (EX)	in HEC	❯ LRS software	in HEC	❯ Yes	

LRS ensures your SAP documents are delivered on time and where they are needed:

LRS provides market-leading scan, print, and output software. It manages documents from anywhere to any device, whether on a traditional corporate network or via the Public Internet. Many of our manufacturing and retail customers use our SAP and SAP S/4HANA certified software to ensure the secure, fast, assured delivery of their SAP documents in printed or electronic form.

Our software takes raw data in an SAP generic format and transforms it into an industry-standard data stream that any of your printers can read. This data stream includes the correct embedded resources to ensure the SAP document is sent in printer-ready form. LRS assured delivery provides real-time feedback in SAP while our automatic diagnostics and error handling features recognize and often correct problems before business processes (e.g., warehouse operations) are impacted. At the same time, our software can send alerts into your scheduling and monitoring tools to help your teams provide superior service.

Once deployed in your environment, LRS software effectively becomes a corporate-wide, digital backbone for managing and controlling the secure capture and delivery of all of your documents. **In so doing, the LRS solution:**

- Establishes a single point of control for all print and scan output, enabling printer manufacturer independence for: SAP, Windows, Mac, Linux, Mainframe.

- Is SAP certified and HEC-ready with support for all major SAP and SAP S/4Hana deployment options.

- Allows central print queue management and automated print queue creation, enabling updates to multiple SAP systems (add/change/delete).

- Provides real-time end-user SAP status feedback for every page or label printed.

- Has a simple web interface to enable quick and easy resolution of print issues; alerts, divert and reprint.

- Establishes a vendor neutral pull print and mobility solution supporting all key platforms.

- Supports foreign character printing (Unicode) and barcode generation.

- Provides native support for Zebra label printers.

- Automates document bundling for consolidated document packs.

- Eliminates costly and unnecessary:
  - Infrastructure (print servers, DIMM cards etc.)
  - Point solution software (pull print, scan workflow etc.)

- Simplifies SAP migration and faster rollout through print optimization.

- Enables dynamic SAP printer tray mapping and the ability to add watermarks to documents generated from SAP test systems.

- Integrates with SAP document composition tools as other 3rd party products.

- Protects sensitive documents with end-to-end encryption, authenticated release and an enterprise-wide audit, reporting and compliance trail.

Generate an estimated:

5-year ROI of **486%**

Breakeven time of **6 months** (*IDC research)
